SPIDER FITTINGS & HARDWARE

A vogue for modern construction and decoration

A fascinating design element that enhances any facade. Whether in straight-lined or segmented facades, or circular configurations with curved glazing, Gentry Spider Fittings meet requirements of functionality and aesthetic elegance.

The arms of the Spider evenly absorb the load at all fixing points while the resilient single-point fixings compensate for thermal expansion and glass panel deformation.

Applications

- Showrooms
- Atriums
- Airports
- Exhibition Rooms
- Glass Roofing
- Canopies
- Reception Areas
